

BYK Additives

Looking for a strong connection?

Whether its automotive or electronic equipment production, cutting-edge industry sectors need high-grade adhesives. That's why many of our industrial partners rely on BYK as an established name and competent-technology partner – because BYK with its diverse range of additives has considerable expertise at its disposal in how to improve the properties of adhesives and sealants. And, consequently, not only large numbers of automakers worldwide are well provided but also many other industries such as the construction, paper and packaging sectors, which have found a strong connection in us.
